## CHALLENGE 4 OF 4 • MySQL v8.0

## Завдання #3

Сталась халепа, механізм загрузку данних дав збій і у таблицю Battles потрапили дублікати.

Напишіть запит, який покаже:

 унікальні рядки з Battles. Ключем унікальності вважати UserID, StageID, BattleID. Вірними є рядки що мають більший ActionTime.

Наприклад, з цих двох рядків:

| UserID | Duration |       |                        |    |
|--------|----------|-------|------------------------|----|
| 3502   | 1        | 35021 | 2020-04-25<br>10:12:00 | 13 |
| 3502   | 1        | 35021 | 2021-03-17<br>12:32:00 | 13 |

має залишитись цей:

| UserID | Duration |       |            |    |
|--------|----------|-------|------------|----|
| 3502   | 1        | 35021 | 2021-03-17 | 13 |
|        |          |       | 12:32:00   |    |

```
